AFSEC’s vision is to enhance Africa’s development and competitiveness through excellence in electrotechnical standardization.

**Formation of AFSEC**

The need for Harmonization of the electrotechnical standards to ensure the reliable and safe operation of the evolving Pan-African power grid was recognized by the Top African Institutions. This was the initial motivation for the formation of AFSEC in 2008 as a subsidiary body of the African Energy Commission (AFREC), which clearly has a major role in supporting electrotechnical industrialization of Africa with adequate quality and reliability. The scope also includes collaboration with related organisations to develop related standards and conformance assurance systems.

The AFSEC Secretariat was located in South Africa until 2018. Since 2019, it has been transferred to Cairo Egypt, where the permanent Head Quarter is now hosted by the Egyptian Ministry of Electricity and Renewable Energy.

**Vision**

AFSEC’s vision is to enhance Africa’s development and competitiveness through excellence in electrotechnical standardization.

**Mission**

- To promote an inter-African cooperation for everything related to electrotechnical standardisation.
- Harmonization of standards and related specifications.
- Remove barriers to trade, to create markets.
- Enhance safety of products.
- Reduce the cost of assurance of compliance.
**Roadmap based on AFSEC Strategic Goals**

- Enhance the recognition of AFSEC as the preeminent authority in electrotechnical standardization.
- Provide a harmonised standardization platform connecting all key stakeholders.
- Foster the involvement of all African stakeholders through their National Electrotechnical Committee (NEC)/Standardization Body.
- Increase the Statutory Membership, encouraging their involvement in technical work of AFSEC.
- Develop mechanisms for focused technical collaboration among technical committees (TCs).
- Foster involvement of Academia in standardization with Young Professionals providing a system that can attract and increase industry participation.
- Promote Conformity Assessment.
- Develop AFSEC Guides.
Main AFSEC Achievements

- **215 Standards** recommended by the Council till 2020 for adoption, in addition to **35** Standards are in the voting process for adoption by National Electrotechnical Committees.

- 4 Published Guides

APUA/ African Power Pools

- Central Africa Power Pool (CAPP)
- Southern Africa Power Pool (SAPP)
- West Africa Power Pool (WAPP)
- Eastern Africa Power Pool (EAPP)
- COMELEC
- APUA

Key Collaboration Strategy with APUA/African Power Pools

- Identifying the Gaps and Challenges with respect to electrotechnical standards (on and off grid) and discussing means of convergence between African countries to increase the power trading between regions.
- Engage APUA and Power Pools in the AFSEC Standardization Process targeting towards harmonization of Standards within African Countries /Regions and that will be achieved by participation in AFSEC Technical Committees.

Impact of Cooperation with APUA/African Power Pools

- Harmonized Standards are necessary in view of Interoperability & Interconnections between various Power Grids, and consequently the Pan-African Grid foreseen to be connected to the European power grid.
- Harmonized standards support the integration of African power grids and IPP’s.
- The evolution of smart grid networks and DER/micro-grids as the future power also needs proactive cooperation to expedite its deployment.
Why Harmonised Standardization is important for the African Continent

Offering an efficient African infrastructure for the improvement, maintenance, and distribution of an appropriate range of standards will improve the wellbeing of the African Populations and accordingly will

• Improve cost effective sustainable access to electricity.
• Improve technical skills covering electrotechnical fields.
• Develop informed users of electrotechnical Standards.
• Increase the efficiency of the industrial processes achieving considerable savings in the design and improving quality of products and services.
• Support conformity systems for improved quality of products.
• Facilitate the trade on the African continent by removing the different technical barriers thus opening up new markets and furthering economic integration and economic growth within AfCFTA (annex 6 TBT).
• Provide the framework to promote harmonization; through collective cooperation among IEC full members and IEC affiliates in Africa.
• Contribute to the improvement of the health and safety of persons and to the protection of the environment in Africa.
